A More Personal Approach to Your Health

Healthcare should never feel like a one-size-fits-all experience.

At Concept Health Clinic, we recognize that every patient brings a unique medical history, personal goals, and individual concerns.

Our approach goes beyond addressing immediate symptoms. We consider your overall health, daily functioning, long-term needs, and the factors that matter most to your quality of life.

Whether you are seeking routine adult medical care or specialized support for age-related health concerns, we aim to make your healthcare experience informative, respectful, and centered on you.

Our Medical Specialties — Comprehensive Care Designed Around Your Needs

General Adult Internal Medicine: Comprehensive medical care focused on adult health, preventive care, the evaluation and management of medical conditions, and ongoing wellness. Our approach emphasizes understanding your medical history, identifying health concerns, and developing appropriate care plans based on your individual needs. CTA: Explore Internal Medicine.

Specialized Geriatric Medicine: As healthcare needs evolve with age, medical care often requires a more comprehensive perspective. Our geriatric focus addresses the complex interaction of medical conditions, medications, mobility, functional independence, and overall well-being. CTA: Explore Geriatric Medicine.

Why Choose Concept Health Clinic? — Experience, Compassion, and Clinical Excellence

- Board-Certified Expertise — Led by a physician board-certified in Internal Medicine and Geriatric Medicine.
- Patient-Centered Care — Medical decisions informed by your health concerns, preferences, and personal goals.
- Extensive Experience — More than 15 years of hospital-based clinical experience across diverse healthcare environments.
- A Comprehensive Perspective — Care informed by experience in medical education, healthcare leadership, and quality improvement.

Meet Your Physician — A Physician. An Educator. A Healthcare Leader.

Dr. Rafay Latif is a board-certified Internal Medicine and Geriatric Medicine physician with more than 15 years of experience in hospital-based medicine.

His professional background includes clinical practice in academic medical centers, Veterans Affairs healthcare settings, and community hospitals, as well as leadership roles in hospital medicine and medical education.

With postgraduate training in Internal Medicine and Geriatric Medicine and a Master of Health Administration from Columbia University, Dr. Latif brings a comprehensive perspective to patient care.

His professional interests include healthy aging, frailty prevention, falls risk reduction, transitions of care, and improving healthcare quality.

Our Approach to Care — More Than Treating Conditions. Understanding People.

We believe effective healthcare begins with listening, continues through informed clinical decisions, and respects the individual needs of every patient. Our approach emphasizes:

- Understanding your medical history and current health concerns.
- Discussing preventive healthcare and long-term wellness.
- Supporting appropriate management of ongoing medical conditions.
- Considering mobility, independence, and functional health as patients age.
- Encouraging informed decisions and clear communication.
- Recognizing the importance of family and caregiver involvement when appropriate.

PAGE 2 — ABOUT CONCEPT HEALTH CLINIC

URL: /about

Healthcare Built Around People, Not Just Conditions.

At Concept Health Clinic, we believe that meaningful healthcare starts with a simple principle: every patient deserves to be heard, respected, and treated as an individual.

Located in Denison, Texas, our clinic provides General Adult Internal Medicine and specialized Geriatric Medicine care.

We understand that health is influenced by more than a single diagnosis. Medical history, lifestyle, medications, functional abilities, personal priorities, and changing healthcare needs all contribute to a patient's overall well-being.

Our philosophy is to bring these factors together through thoughtful clinical evaluation, clear communication, and evidence-based medical care.

Our Mission

To provide compassionate, evidence-based Internal Medicine and Geriatric Medicine care that supports patient well-being, informed medical decisions, and healthy aging.

Our Vision

To become a trusted healthcare resource for adults and older adults in Denison and surrounding communities through clinical excellence, patient-centered care, and a commitment to continuous improvement.

Our Core Values

- Compassion — We approach every patient with empathy, dignity, and respect.
- Clinical Excellence — We value evidence-based medical knowledge, sound clinical judgment, and continuous learning.
- Integrity — We believe in honest communication, professional accountability, and transparent healthcare decisions.
- Collaboration — We recognize the importance of working with patients, families, caregivers, and other healthcare professionals.
- Respect for Individuality — We acknowledge that healthcare priorities differ from person to person and may change over time.
- Continuous Improvement — We support quality improvement and thoughtful approaches to enhancing healthcare experiences and outcomes.

Our Philosophy of Healthy Aging — Aging Is Personal. Your Healthcare Should Be Too.

Growing older can bring new opportunities, priorities, and healthcare challenges.

Some individuals remain active and independent well into later life. Others may need additional medical support as chronic conditions, medications, mobility concerns, or functional limitations become more

complex.

Our geriatric approach recognizes these differences.

Rather than focusing solely on individual diagnoses, we consider how medical concerns may affect everyday life, independence, and personal goals.

We believe that compassionate, informed care can help patients and families navigate these decisions with greater understanding and confidence.

URL: /dr-rafay-latif

Dr. Rafay Latif, MD, MHA

Board-Certified Internal Medicine & Geriatric Medicine Physician

Dedicated to Clinical Excellence, Medical Education, and Better Patient Care

Dr. Rafay Latif is a board-certified physician specializing in Internal Medicine and Geriatric Medicine, with more than 15 years of clinical experience in hospital-based medicine.

His career reflects a commitment to comprehensive patient care, academic medicine, healthcare leadership, and evidence-based quality improvement.

Dr. Latif has worked across diverse healthcare settings, including Veterans Affairs healthcare environments, tertiary academic medical centers, and community hospitals. These experiences have provided him with extensive exposure to complex medical conditions, interdisciplinary care, and the challenges patients face when navigating different healthcare settings.

Clinical Experience & Leadership

Throughout his career, Dr. Latif has combined direct patient care with healthcare leadership and medical education.

He previously served as Chief Hospitalist at Harlem Hospital Center, where his responsibilities included hospital medicine leadership and clinical care.

He has also held academic faculty appointments in Internal Medicine and currently serves as a hospitalist across multiple healthcare systems in Texas.

His clinical and leadership experience has contributed to his understanding of healthcare quality, transitions of care, hospital readmissions, and collaborative medical practice.

A Commitment to Medical Education

In addition to his clinical responsibilities, Dr. Latif has maintained a strong interest in academic medicine and physician education.

His professional background includes faculty leadership experience and serving as Editor-in-Chief for the Geriatric Section of StatPearls, a medical education resource.

These experiences reflect his ongoing engagement with clinical knowledge, education, and the advancement of medical practice.

Advanced Medical Training

- Geriatric Medicine Fellowship — Northwell Health / Zucker School of Medicine at Hofstra University; Manhasset, New York.
- Internal Medicine Residency — Columbia University – Harlem Hospital Center; New York, New York.

- Master of Health Administration (MHA) — Columbia University.

Board Certifications

- Internal Medicine
- Geriatric Medicine

Areas of Clinical & Professional Interest

- Geriatric Medicine and healthy aging
- Frailty prevention
- Falls risk reduction
- Transitions of care
- Healthcare quality improvement
- Hospital readmission reduction
- Medical education
- Population health
- End-of-life care

Professional Highlights

- More than 15 years of clinical experience in hospital medicine.
- Former Chief Hospitalist at Harlem Hospital Center.
- Academic faculty experience in Internal Medicine.
- Hospitalist experience across multiple Texas healthcare systems.
- Editor-in-Chief for the Geriatric Section of StatPearls.
- Master of Health Administration from Columbia University.
- Leadership experience in frailty prevention and quality improvement initiatives.

A Thoughtful Perspective on Patient Care

Dr. Latif’s clinical background reflects an understanding that effective medical care requires more than evaluating symptoms or managing individual conditions.

It also requires considering the patient’s overall health, medical complexity, functional needs, and individual preferences.

His approach is informed by extensive clinical experience, medical education, and a commitment to improving healthcare quality.

PAGE 4 — INTERNAL MEDICINE

URL: /internal-medicine-denison-tx

Comprehensive Internal Medicine in Denison, Texas

Personalized Medical Care for Your Adult Health Needs

Your health needs can change throughout adulthood. Having access to an experienced Internal Medicine physician can help you better understand medical concerns, manage ongoing conditions, and make informed decisions about your health.

At Concept Health Clinic, we provide General Adult Internal Medicine care with an emphasis on comprehensive clinical evaluation, evidence-based treatment, and patient-centered communication.

Led by Dr. Rafay Latif, MD, MHA, our practice combines extensive medical experience with a thoughtful approach to your individual healthcare needs.

What Is Internal Medicine?

Internal Medicine is a medical specialty focused on the prevention, diagnosis, and treatment of health conditions affecting adults.

Internal Medicine physicians are trained to evaluate a wide range of medical concerns, including complex conditions that may involve multiple organ systems.

Their expertise can be especially valuable when patients need comprehensive medical assessment, ongoing management of chronic conditions, or coordination across different areas of healthcare.

Our Internal Medicine Services

Proposed descriptions for the confirmed General Adult Internal Medicine offering. Individual appointment types and services should be verified before publication.

Preventive Healthcare

Preventive care plays an important role in maintaining long-term health. Depending on individual needs, visits may include health-risk assessments, discussions about recommended screenings, lifestyle factors, and preventive healthcare planning.

Chronic Disease Management

Living with an ongoing medical condition can require regular monitoring, treatment adjustments, and informed decision-making. Internal Medicine care can support the evaluation and ongoing management of conditions such as hypertension, diabetes, and other chronic adult medical concerns, according to the services available at the clinic.

Comprehensive Medical Evaluation

Some health concerns involve multiple symptoms or overlapping conditions. A comprehensive evaluation considers your medical history, medications, symptoms, examination findings, and appropriate diagnostic information to guide clinical decisions.

Medication Review

Understanding how medications work together is an important part of comprehensive medical care, particularly for patients managing multiple conditions. Medication review may help identify potential concerns, clarify treatment plans, and support appropriate medication use.

Ongoing Adult Healthcare

Internal Medicine care can provide continuity as health needs evolve over time. This may include follow-up appointments, monitoring of established conditions, and coordination with other medical professionals when appropriate.

Why Choose Concept Health Clinic for Internal Medicine?

Our approach is informed by Dr. Latif’s extensive background in hospital medicine, complex medical care, and healthcare quality improvement.

We emphasize clear communication, careful evaluation, and medical decisions that reflect each patient’s circumstances.

Your Health Is More Than a Diagnosis.

Whether you are addressing an ongoing condition or seeking guidance about your general health, our focus is on understanding your concerns and helping you navigate your care.

PAGE 5 — GERIATRIC MEDICINE

URL: /geriatric-medicine-denison-tx

Specialized Geriatric Medicine in Denison, Texas

Thoughtful Care for the Complexities of Aging

Aging brings changes that can affect health, mobility, independence, and everyday life.

At Concept Health Clinic, our specialized Geriatric Medicine services focus on the medical needs of older adults, particularly those managing multiple conditions or experiencing age-related healthcare challenges.

Under the care of Dr. Rafay Latif, MD, MHA, a board-certified Geriatric Medicine physician, our approach emphasizes comprehensive medical assessment, individualized care planning, and respect for each patient’s goals and preferences.

What Is Geriatric Medicine?

Geriatric Medicine is a medical specialty dedicated to addressing the unique healthcare needs of older adults.

Unlike care that focuses only on a specific disease or organ system, Geriatric Medicine takes a broader view of health.

This may include evaluating medical conditions alongside mobility, medication use, functional abilities, cognitive concerns, and the support a patient needs in everyday life.

The goal is to help patients and families make informed decisions that consider overall well-being and quality of life.

Our Geriatric Medicine Focus

Comprehensive Geriatric Assessment

A comprehensive geriatric assessment considers multiple aspects of an older adult’s health, which may include medical conditions, medications, mobility, functional abilities, and personal healthcare priorities. This broader perspective can help identify concerns that may otherwise be overlooked.

Frailty Prevention & Management

Frailty is associated with increased vulnerability to health-related challenges. Evaluating factors such as physical function, strength, and overall medical condition can help guide appropriate discussions about maintaining health and independence.

Falls Risk Evaluation

Falls can have significant consequences for older adults. Assessing medical, functional, and medication-related risk factors may help identify opportunities for individualized fall-prevention strategies.

Complex Chronic Condition Management

Older adults may live with several medical conditions at the same time. Geriatric care considers how these conditions and their treatments interact, with attention to overall health, treatment burden, and patient priorities.

Medication Review & Polypharmacy Concerns

Taking multiple medications can increase the complexity of medical care. A medication review can help evaluate potential interactions, treatment burden, and whether prescribed therapies remain appropriate for an individual's circumstances.

Transitions of Care

Moving between the hospital, home, rehabilitation, or other care settings can be challenging. Thoughtful transitions-of-care planning considers continuity of treatment, medication information, follow-up needs, and communication among healthcare professionals.

Goals of Care & Advance Care Planning

Medical decisions should reflect the patient's values, preferences, and healthcare priorities. Discussions about goals of care and advance care planning can help patients and families better understand available options and prepare for future decisions.

When Might Geriatric Medicine Be Helpful?

A geriatric evaluation may be worth considering when an older adult experiences:

- Multiple chronic medical conditions.
- Increasing difficulty managing medications.
- Recurrent falls or changes in mobility.
- Frailty or declining physical function.
- Changes in the ability to perform daily activities.
- Frequent hospital visits or challenging care transitions.
- Complex healthcare decisions requiring a broader perspective.

Not every older adult requires specialized geriatric care. The need depends on medical complexity, functional concerns, and individual circumstances.

Supporting Patients and Families

Healthcare decisions often involve patients, family members, and caregivers.

We recognize that these conversations can be especially important when medical needs become more complex.

Our patient-centered philosophy emphasizes communication, dignity, and respect for individual preferences, including appropriate caregiver involvement with the patient's consent.

Aging with Dignity. Care with Understanding.

Our focus is not simply on adding years to life, but on understanding the medical needs and personal priorities that contribute to meaningful well-being.

Helpful Information for Your Healthcare Journey

At Concept Health Clinic, we want patients to feel informed and prepared when seeking medical care.

This page provides access to our patient portal, appointment preparation information, and answers to frequently asked questions.

Patient Portal — Convenient Access to Your Healthcare Information

Our online patient portal provides secure access to the patient services enabled by Concept Health Clinic.

Use the portal to sign in and review the features available for your account.

Patient Portal URL: https://mycw263.ecwcloud.com/portal32043/jsp/100mp/login_otp.jsp

Button: Access Patient Portal

External patient portal. Available features depend on the clinic’s portal configuration.

Preparing for Your Appointment

To help make your appointment productive, consider bringing:

- A government-issued photo ID.
- Your insurance card, if applicable.
- A current list of medications and supplements.
- Relevant medical records or recent test results.
- Information about recent hospitalizations.
- A list of symptoms, concerns, or questions.
- Contact details for other healthcare professionals involved in your care.

For geriatric appointments, information about recent falls, mobility changes, daily functioning, or medication difficulties may also be helpful.

Patients who would like a family member or caregiver to participate should contact the clinic to discuss appropriate arrangements.

Frequently Asked Questions

What is the difference between Internal Medicine and Geriatric Medicine?

Internal Medicine focuses on adult healthcare, including the prevention, evaluation, and management of medical conditions. Geriatric Medicine provides additional expertise in the complex medical and functional needs of older adults.

Does Concept Health Clinic see adults who are not seniors?

Yes. Concept Health Clinic provides General Adult Internal Medicine as well as specialized Geriatric Medicine appointments.

Do I need to have multiple medical conditions to see a geriatric physician?

Not necessarily. Geriatric Medicine can be helpful for a variety of age-related medical concerns. Whether a consultation is appropriate depends on the patient's individual needs.

Can geriatric care help with falls or mobility concerns?

Geriatric evaluation can consider medical and functional factors associated with falls and changes in mobility. Recommendations depend on the individual's circumstances.

Can I bring a family member to my appointment?

Contact the clinic to discuss caregiver or family participation. The patient's preferences and applicable privacy requirements will guide arrangements.

Does the clinic provide chronic disease management?

General Adult Internal Medicine includes the evaluation and management of adult medical conditions. Contact the clinic to confirm availability for your specific healthcare needs.

How do I request an appointment?

Call Concept Health Clinic at (903) 600-2100 during business hours. You may also access the patient portal for available online services.

Does Concept Health Clinic accept my insurance?

Please contact the clinic directly to confirm accepted insurance plans, coverage, and billing arrangements before your appointment.

What should I do in a medical emergency?

Call 911 or seek immediate emergency medical care. The clinic website and ordinary email are not emergency communication channels.

Heading Structure

Each page should contain one H1 reflecting its primary topic. Major content sections should use H2 headings, with H3 headings for individual services or supporting topics. Avoid repeating the same H1 across multiple pages.

Structured Data

Implement MedicalClinic or the most appropriate supported medical business schema, including clinic name, address, telephone, website URL, verified business hours, medical specialty information, physician information and credentials, official clinic logo, and canonical URLs.

Use Physician structured data for Dr. Rafay Latif's dedicated biography page, where applicable. Only publish structured data that accurately reflects visible, verified website content.

Local SEO Keyword Themes

Priority	Keyword Theme
Primary	Internal Medicine Denison TX
Primary	Geriatric Medicine Denison TX
Primary	Internal Medicine Doctor Denison TX
Primary	Geriatric Doctor Denison TX
Branded	Dr. Rafay Latif Denison
Branded	Concept Health Clinic Denison
Supporting	Adult Medical Care Denison TX
Supporting	Senior Medical Care Denison TX

These are relevance-based keyword recommendations, not verified search-volume or ranking estimates. Avoid keyword stuffing, unsupported claims such as “best doctor in Texas,” and near-identical location pages for communities where the clinic has no physical office.

DESIGN & DEVELOPMENT REQUIREMENTS

Approved Website Color Palette

Color	Hex	Usage
Heritage Navy	#103B5C	Headings, navigation, footer
Healing Green	#438C68	Primary buttons and highlights
Soft Sage	#E7F2ED	Subtle background sections
Pearl White	#F7F9FA	Main page background
Charcoal Slate	#263746	Body text
Pure White	#FFFFFF	Cards and surfaces

Typography

Headings: DM Sans or Manrope, using clear and confident typography.

Body text: Inter or Source Sans 3, with comfortable line spacing and accessible text sizes.

For an older-adult audience, prioritize readability, high contrast, clear labels, visible focus indicators, and easy-to-use navigation over decorative effects.

Photography Direction

Use authentic, professionally photographed images of Dr. Rafay Latif and the clinic wherever possible.

Supporting photography should depict respectful physician-patient interactions, adults of different ages, and older adults in realistic healthcare settings.

Avoid imagery that portrays aging only through frailty, disability, or dependency. Obtain appropriate consent before publishing identifiable patient photographs.

Technical Requirements

- Mobile-first responsive design.
- Accessible navigation and keyboard interactions.
- Fast-loading, optimized WebP or AVIF images.
- Descriptive image alt text.
- HTTPS across the entire website.
- Unique page titles, meta descriptions, and canonical URLs.
- XML sitemap and robots.txt configuration.
- Google Search Console integration.
- Properly configured local business information.

- Accessible forms with spam protection.
- Clear external patient portal links.
- Privacy and accessibility policies reviewed before publication.

Because this is a healthcare website, any forms collecting protected health information must use an appropriately secured, HIPAA-compliant workflow where applicable. Do not send sensitive patient information through ordinary email or unapproved analytics tools.

FINAL PRE-PUBLICATION CHECKLIST

- Confirm clinic phone, suite number, and Saturday hours against current office records.
- Verify Dr. Latif’s current board certifications, professional appointments, and StatPearls editorial role.
- Confirm the exact outpatient services and appointment types offered.
- Confirm accepted insurance plans and whether the clinic is accepting new patients.
- Confirm patient portal functions and whether online appointment requests are enabled.
- Obtain approved photographs of Dr. Latif and the clinic.
- Review all medical copy with Dr. Latif before publication.
- Finalize privacy, accessibility, and patient communication policies.
- Test contact forms, telephone links, patient portal, mobile layouts, and metadata.

Publication Status

The core website copy, information architecture, branding, calls to action, and SEO recommendations are ready for developer integration. Clinical service details, current credentials, operational information, and legal notices require final clinic approval before the website goes live.
